

Precision Planting

20/20 Gen 3

- **1.** Download your variable rate recommendation from your Advantage Acre[®] account, and place the zipped file into your flash drive.
- 2. To unzip the files, right click on the zipped folder. Select **Extract All**, then hit **Extract** to unzip the files.

Open	
Open in new window	← 👔 Extract Compressed (Zipped) Folders
Extract All	Select a Destination and Extract Files
Pin to Start	Files will be extracted to this folder:
Open with	E\Rick Miller Sec 35, Huron Farms (VRx) Browse
Send to	> Show extracted files when complete
Cut	
Сору	
Copy Create shortcut	
Copy Create shortcut Delete	
Copy Create shortcut Delete Rename	

After unzipping the files, there will be three files unzipped on your flash drive.

Rick Miller Sec 35, Huron Farms (VRx).dbf	10/16/2017 3:20 PM	DBF File	301 KB
Rick Miller Sec 35, Huron Farms (VRx).shp	10/16/2017 3:20 PM	SHP File	125 KB
Rick Miller Sec 35, Huron Farms (VRx).shx	10/16/2017 3:20 PM	SHX File	3 KB

3. Create a new folder in your flash drive named <u>Sendto2020</u>, this is very important so that the monitor knows where to pull the recommendation.

This PC								

5. Insert the flash drive into the back or side of the 20/20 monitor. Do not insert flash drive into the display base module (DBM).

6. Turn on the 20/20 monitor. Once on the home page, select **Setup button** located on the lower right-hand corner of the monitor.

7. On the Setup Page, select the **Data tab** located in the bottom right-hand corner of the screen.

- 8. Select the **import button** located at the right side of the screen.
- **9.** Select the **Prescription/Boundary button.** Once the prescriptions are imported select the home screen.

Setup > Data > Import			1.5 & 5:07 PM

Sand Track Rx_poly	C4CORN	Training_Rx_06	Training_Rx_08
Training_Rx_05	Training_Rx_07		

- **14.** After selecting the prescription, you will need to select an attribute. The attribute page will appear after you have selected a prescription, or you can go to the attribute button located on the field setup page.
 - Once you are on the attribute page you will need to select **Tgt_Rate_s**. This is what the monitor uses for population.
 - If loading a **multi-hybrid recommendation**, assign an attribute to both the blue, and the orange tank, shown in the second picture.
